www.homebiome.com

This Permaculture Design will further transform your home and property into a place where your family and guests will feel a true sense of ease, beauty and abundance as these ecological communities mature with you on your journey of living in this sacred place.

This report offers a diversity of permaculture recommendations that are tailor suited to your stated goals. All of our recommendations are geared towards integrating the elements of the design to be ecologically as well as economically productive and in beneficial and functional relationships. All the hedgerows, gardens, containers and overall site improvements which are recommended will be low maintenance, low tech, passive and grounded in ecological design and permaculture principles.
